Megatrends

How digitalization is transforming our world

Worldwide data volume doubles every two years. By 2020, it will have grown to 40 zettabytes – that's a 50-fold increase within ten years

Data volume

40 zettabytes
by 2020

Worldwide revenue

€4.1 trillion
in 2014

Worldwide revenue of the IT and communications industries reached a record €4.1 trillion in 2014.

Revenue from apps alone amounted to US\$72 billion in 2013 and will more than double by 2017

Revenue from apps

US\$72 billion
in 2013

10% increase leads to

0.75% rise
in per capita GDP

Digitalization boosts GDP – a 10% increase in the digitalization level of a country leads to a 0.75% rise in per capita GDP.

Megatrends

How globalization is transforming our world

Global trade

Between 2000 and 2012 the total volume of global trade tripled.

Global trade volume

tripled

between 2000 and 2012

Supply chains account for

~80%

of global trade

Multinational companies

The supply chains of global companies account for about 80% of global trade.

Growth of emerging markets

By 2030, China will have overtaken the U.S. as the world's largest economy, and Brazil will overtake Japan.

By 2030

China

will be the world's
largest economy

Megatrends

How urbanization is transforming our world

I Growth of cities

2009 – For the first time in history, more than 50% of the world's population lived in cities.

2050 – 70% of the world's population will live in cities.

By 2050

70%

of the world's population
will live in cities

I Megacities worldwide

1970 – two megacities with more than 10 million inhabitants

2025 – 37 megacities; more than 14% of the world's population will live in a megacity.

By 2025

37 megacities

worldwide

Megatrends

How demographic change is transforming our world

I World population

2012 – 7.1 billion people

2050 – 9.6 billion people

I Worldwide life expectancy at birth

2012 – 70 years

2050 – 82 years

By **2050**, the share of the population aged 60 or over will, for the first time, equal the share of the population younger than 15.

A line graph showing worldwide life expectancy at birth. The line starts at 70 years in 2012 and rises to 82 years by 2050. The graph is composed of many small vertical bars that form a continuous line. The text 'By 2050' is above the final data point, and '82 years life expectancy' is below it.

Year	Life expectancy (years)
2012	70
2050	82

Megatrends

How climate change is transforming our world

- I **2013** – highest CO₂ concentration in the atmosphere in 800,000 years
- I **2001 to 2010** – warmest decade on record

Highest CO₂ concentration in
800,000
years

Vision 2020

Three cornerstones for a successful future

A clear mission

A lived ownership culture

A consistent strategy

Vision 2020

A clear mission

Our mission

I We make real what matters,
by setting the benchmark
in the way we
electrify, automate and digitalize
the world around us.
Ingenuity drives us
and what we create is yours.
Together we deliver.

I Making real what matters I

Vision 2020

A lived ownership culture

Equity

We strongly believe that employee shareholders act responsibly and are oriented to the long term when they directly participate in their Company's success. That's why the equity culture is an integral part of our ownership culture.

Values

If everyone in the Company acts responsibly, achieves excellent results and is innovative, they will personally contribute to the sustainable success of Siemens. Responsible, excellent, innovative – these values are the foundation of our ownership culture.

Leadership

Our managers should serve as role models for the Company's strategic direction and ensure the sustainable and efficient use of available resources – thus inspiring and empowering their teams to give their best for the Company.

Behaviors

Entrepreneurial behavior should be the standard and foundation for how we act at Siemens. This applies to each individual in the Company – since only then can behaviors constantly evolve and improve.

People orientation

We strive for a people-oriented approach that values and clearly fosters diversity of experience and expertise. If this is reflected in all that we do, we'll improve the performance of our Company.

Vision 2020

A consistent strategy

Our strategy

- | With our positioning along the electrification value chain, we have know-how that extends from power generation to power transmission, power distribution and smart grid to the efficient application of electrical energy.
- | And with our outstanding strengths in automation, we're well equipped for the future and the age of digitalization.

| Setting the course |

Vision 2020

Timeline for the implementation of our strategy

Vision 2020

Seven goals

Implement stringent corporate governance

Execute financial target system

Be a partner of choice for our customers

Foster an ownership culture

Create value sustainably

Expand global management

Be an employer of choice

Positioning

Well positioned in electrification, automation and digitalization

Our setup is aligned with framework conditions worldwide, with the long-term trends that define our markets, with our competitive environment and with the requirements of customers, partners and societies.

Power and Gas

Powerhouse in power generation

||||| We offer a broad spectrum of products and solutions for the environmentally compatible and resource-saving generation of electricity from fossil and renewable fuels and for the reliable transport of oil and natural gas. Our customers are utilities, independent power producers and engineering, procurement and construction (EPC) companies as well as businesses in industries such as oil and gas.

Orders	in millions of €	13,996	15,100
Revenue	in millions of €	12,720	14,016
Employees (as of September 30)	in thousands	42	45

Wind Power and Renewables

World market leader in offshore wind power

We're one of the leading providers of solutions in the growing field of onshore and offshore wind power. To maximize cost-efficiency – a key factor in the industry – we're further optimizing our manufacturing and logistics processes and driving innovations in plant technology. By rigorously adapting our offerings to diverse regional conditions, we provide customers with optimized solutions that precisely meet their market-specific requirements.

Energy Management

Partner for efficient energy infrastructure

||||| We're one of the world's leading suppliers of products, systems, solutions and services for the economical, reliable and smart transmission and distribution of electrical energy. As a trusted partner for the provision and expansion of efficient, sustainable energy infrastructure, we offer power utilities and industrial companies a portfolio that ranges from systems for low-voltage grids and distribution grids to solutions for smart grids and energy automation systems to power supply systems for industrial plants and high-voltage transmission systems.

Revenue	in millions of €	10,708	11,672
Employees (as of September 30)	in thousands	53	54

Building Technologies

World leader in building technologies

We're the world's leading provider of safe, secure, energy-efficient and eco-friendly buildings and infrastructures. As a technology partner, consultant, service provider, systems integrator and product vendor, we have offerings for fire safety, security, building automation, heating, ventilation, air conditioning and energy management.

Process Industries and Drives

Increased productivity, shorter time to market

We're building on our leading market position in the growth field of process industries and drives. With a clear focus on customer requirements now and in the future, we offer products, systems, solutions and services across entire life cycles for all industry sectors. As a trusted partner, we deliver the innovative and integrated technologies and the related industry expertise that ensure our customers' competitiveness and sustainable growth.

Healthcare

Next-generation medical technology

We're one of the world's largest suppliers of technology for the healthcare industry and a leader in medical imaging, laboratory diagnostics and solutions for the healthcare IT. Since October 1, 2014, Healthcare is separately managed within Siemens. This gives us greater entrepreneurial freedom to tailor our business processes to the needs of customers. Our aim is to help them meet the challenges of a changing business environment and successfully make the transition to next-generation healthcare.

Financial Services

Optimal financial solutions for business customers

||||| We're a provider of business-to-business financial solutions. We facilitate customer investments with leasing and equipment solutions as well as project and structured financing. In addition to providing capital for customers of Siemens and other companies, we also serve as an advisor and manager of financial risk within Siemens. Our combined financial and industry know-how creates value for our customers and enhances their competitiveness. By providing accompanying financing, we also build trust in new technologies and enable innovative business models.

Siemens in Germany

Backbone of infrastructure

- I More than half of the power plants connected to Germany's power grid use Siemens turbines and generators.
- I About 1% of Germany's jobs are directly or indirectly linked to Siemens.
- I Every second computed tomography scanner in German clinics is from Siemens.

		FY 2014	FY 2013
Revenue	in millions of €	10,857	10,652
Employees (as of September 30; continuing operations)	in thousands	115	117

I Siemens – technology partner for Germany I

Siemens in Europe

Boosting the continent's competitiveness

- I More than 80% of the automobile factories in Europe use Siemens automation and drive technologies.
- I More than half of Europe's installed offshore wind power capacity is from Siemens.
- I One third of the buildings that are used commercially in Europe are equipped with Siemens building technologies.

- I Siemens automation systems improve I efficiency at factories throughout Europe.

Siemens in Russia

Modern technologies for the world's largest country

| Sapsan in Russia |

- | Key components for a power station that will supply power to Yamal liquefied natural gas production plant in Northern Russia
- | Water supply and drainage system for St. Petersburg's municipal water supply and waste water treatment
- | Angiography systems for Federal Medical Research Centre Almazov in St. Petersburg
- | 1,200 Lastochka trains to be produced at Ural Locomotives' plant

		FY 2014	FY 2013
Revenue	in millions of €	1,783	2,076
Employees (as of September 30; continuing operations)	in thousands	3	3

Siemens in Africa

Pioneer in sustainable development

- I In Nigeria, Siemens commissioned the 434 MW Geregu II gas-fired simple cycle power plant in Ajaokuta, Kogi State.
- I Siemens is playing an active role in Africa's renewable energy drive – having built and building new wind farms in Morocco and South Africa.
- I In Mozambique, Siemens is delivering and installing the technology that will supply power to the deep water seaport of Nacala-a-Velha.
- I Siemens is helping upgrade Africa's rail infrastructure – providing signaling technology for Mozambique's Nacala-Moatize line and upgrading greater Johannesburg's rail system.

I Power plant in Geregu I

Siemens in the Middle East

Technology partner of choice

| Siemens – technology partner |
for the Middle East

- | In Qatar, Siemens is building the Middle East's most energy-efficient tram system.
- | Abu Dhabi's 1.6 GW Shuweihat S3 combined cycle power plant (CCPP) was handed over by Siemens in 2014. This completes the trio of S1, S2 and S3, producing a combined 4.6 GW.
- | Siemens will supply the turnkey system for two driverless metro lines in the world's largest subway project in Riyadh, Saudi Arabia.
- | Siemens supplied a full building management system to Dubai International Airport.
- | Siemens is implementing full lab automation at Bahrain's King Hamad University Hospital.

Siemens in China

A local company

| Siemens, a local partner |

- | Siemens provided energy-saving retrofit solutions for Area A of the Canton Fair Complex.
- | Siemens and Beijing Automotive Industry Holding Co., Ltd. signed a joint venture agreement to produce highly efficient motors and inverters for hybrid and electric vehicles.
- | Siemens received an order to provide four CO₂ compressors for a coal liquefaction plant of Shenghua Ningxia Coal Industry Group Co. Ltd.

		FY 2014	FY 2013
Revenue	in millions of €	6,442	5,866
Employees (as of September 30; continuing operations)	in thousands	32	31

Siemens in India

Integrated solutions for India's sustainable progress

- I Siemens installed world's longest lab automation track at Thyrocare.
- I Siemens signed Memorandum of Understanding with Government of Gujarat and Steel Authority of India (SAIL) for skill development of industrial workforce.
- I Siemens reinforced its commitment as a partner for India's National Grid Agenda by supplying Capacitive Voltage Transformer for Power Grid's 1,200 kVA National Test Station project.

		FY 2014	FY 2013
Revenue	in millions of €	1,830	1,623
Employees (as of September 30; continuing operations)	in thousands	19	16

I Capacitive Voltage Transformer I

Siemens in Australia

Setting the benchmark

Siemens – setting the benchmark in Australia and New Zealand

- | Siemens wind turbines at Snowtown II wind farm are providing clean, emission-free power for 180,000 Australian homes.
- | New Zealand's Inter-Island HVDC link has been strengthened by Siemens to meet the highest seismic standards and increase capacity by more than 70%.
- | Energy efficiency upgrades carried out by Siemens will ensure the Melbourne Cricket Ground's standing as one of the world's most environmentally sustainable stadia.
- | Siemens is supplying one of Australia's largest mining projects with a complete power distribution solution, including integrated e-houses and mechanical drives. The Roy Hill mine will produce 55 million tonnes of iron ore per annum.

		FY 2014	FY 2013
Revenue	in millions of €	1,074	1,540
Employees (as of September 30; continuing operations)	in thousands	2	2

Siemens in the United States

Sustainable solutions for the world's largest economy

**| Gas turbine in Siemens plant |
in Charlotte, North Carolina**

- | Over the past 15 years, Siemens invested more than US\$25 billion in the U.S.
- | Siemens power generation solutions help meet one third of the country's total energy needs.
- | Our acquisition of Dresser-Rand, the premium equipment provider for the oil and gas industry, is designed to strengthen our business in North America. It will enable us to get closer to customers there and become a key player in the American oil & gas revolution.

		FY 2014	FY 2013
Revenue	in millions of €	12,876	13,110
Employees (as of September 30; continuing operations)	in thousands	46	47

Siemens in Brazil

Reliable infrastructure partner

- I Siemens helped to develop an intelligent system for monitoring and controlling power transmission in real time, uniting complex Brazilian electrical grid under one smart digital center.
- I More than 50% of the electrical power in Brazil is generated by Siemens technologies.
- I 13 Siemens plants and eight Siemens R&D centers are located in Brazil.

		FY 2014	FY 2013
Revenue	in millions of €	1,515	1,806
Employees (as of September 30; continuing operations)	in thousands	6	8

I Control center of Brazil's national grid operator ONS I
