

DataBase Desig Examination Jan. 2021

2nd Subject

E-Mail to Calin.Cenan@cs.utcluj.ro, CalinOvidiu.Cenan@gmail.com scan with solutions written by hand until **h13:00**

... in Terms of ...

Explain the following terms briefly: attribute, domain, entity, relationship, entity set, one-to-many relationship, many-to-many relationship, atomicity, consistency, isolation, durability, dirty read, unrepeatable read, serializable schedule.

Also explain how it a specialization-generalization hierarchy in database design it is somehow different then the structures you previously design for the IS-A ontology.
