

Examen: PROGRAMARE PARALELĂ --- 15.06.2020
Subiect R2 (10 minute) (10 puncte)

- a) Câte procese crează următoarele apeluri C pentru UNIX?
(numărați inclusiv procesul *main* apelant)

Răspuns: f(1)____; f(2) ____; f(3) ____; f(4) ____; f(k) ____; k>4

```
void f(int k)
{
    for(int i=0; i<k ; i++)
        fork();
    fork();
}
```

- b) Câte procese crează următoarele apeluri C pentru UNIX?
(numărați inclusiv procesul *main* apelant)

Răspuns: f(1)____; f(2) ____; f(3) ____; f(4) ____; f(k) ____; k>4

```
void f(int k)
{
    if(k>0)
    {
        fork();
        f(k-1);
        fork();
    }
}
```

Exam: PARALLEL PROGRAMMING --- 15.06.2020
Subject E2 (10 minutes) (10 points)

- a) How many processes are created by the following C function calls (for UNIX)?
(include the calling *main* process)

Answer: f(1)____; f(2) ____; f(3) ____; f(4) ____; f(k) ____; k>4

```
void f(int k)
{
    for(int i=0; i<k ; i++)
        fork();
    fork();
}
```

- b) How many processes are created by the following C function calls (for UNIX)?
(include the calling *main* process)

Answer: f(1)____; f(2) ____; f(3) ____; f(4) ____; f(k) ____; k>4

```
void f(int k)
{
    if(k>0)
    {
        fork();
        f(k-1);
        fork();
    }
}
```
