State	Finished
Completed on	Tuesday, 27 April 2021, 10:03 AM
Time taken	2 mins 26 secs
Marks	50.00/50.00
Grade	10.00 out of 10.00 (100%)

Question **1**

Correct

Mark 10.00 out of 10.00

To create a class that allows to be instantiated in a fixed number of objects we have to

Select one or more:

- ☐ a. Use a prototype
- ☐ b. Make the constructor public
- ☒ c. Make the constructor private ✓
- ☒ d. Keep the created instances ✓
- ☒ e. Define a public method to access the created instances ✓

Your answer is correct.

Question **2**

Correct

Mark 10.00 out of 10.00

An Abstract Factory can contain

Select one:

- ☐ a. A set of factory methods
- ☐ b. A set of prototype objects
- ☐ c. A parameterized factory method
- ☐ d. Both factory methods and prototypes
- ☒ e. All of the above ✓

Your answer is correct.

Question **3**

Correct

Mark 10.00 out of 10.00

A factory method

Select one or more:

- ☐ a. Cannot use a prototype to create the product
- ☒ b. Can be parameterized to avoid subclassing ✓
- ☒ c. Encapsulates the creation of a specific product ✓
- ☒ d. Promotes subclassing to change the product that gets created ✓
- ☐ e. Is always defined with the "creator" class

Your answer is correct.

Question **4**

Correct

Mark 10.00 out
of 10.00

The Abstract Factory is used to

Select one:

- ☐ a. Create abstract classes
- ☒ b. Create objects of different classes that need to be compatible ✓
- ☐ c. Create prototypes
- ☐ d. Create interfaces
- ☐ e. None of the above

Your answer is correct.

Question **5**

Correct

Mark 10.00 out
of 10.00

A prototype object

Select one or more:

- ☒ a. Contains a clone method to create other similar objects ✓
- ☐ b. Uses Deep copy to implement the clone operation
- ☒ c. Enables decoupling between the Creator and the Product ✓
- ☒ d. Can be specified at run-time ✓
- ☒ e. Represents the Product that needs to be instantiated ✓

Your answer is correct.
